

ITS INTEGRATOR OVERVIEW

A step ahead and top of its class

You're in the business of education. Your customers are your students, your staff and external stakeholders. The products you supply are courses and programmes. Your business processes focus not only on registration, timetabling, examinations and graduations, but also on financial and human resource management. Running a world-class operation includes research, scholarships, library management and alumni business support.

We at Adapt IT Pretoria have a rich history spanning more than 25 years as a global provider of comprehensive administrative ERP solutions for higher and further education institutions. We pride ourselves on a culture that is based on strong, longstanding client relationships, and our staff 's passion for service excellence.

Our ITS Integrator product suite, which is suitable for small, medium and large institutions, provides a rich set of functionality to enable back-office and front-office operations, as well as self-service functions for students and staff alike, including:

- Student Management
- Finance Management
- Human Resources and Payroll

- Library Management
- Management Information (MIS)
- Facilities Management

The ITS Integrator product development roadmap demonstrates our understanding of the highly dynamic and frequently changing educational landscape. We have a strong commitment to ongoing, client-influenced development of the product suite.

Quoting from a review by Gartner "For higher education institutions, we analyze the suites of administrative core applications that support integrated strategies for HR, Financials and Student information systems...

ITS provides a lower-cost alternative for institutions considering an integrated solution...The product road map for modernization continues to be developed, and customers value the changes being made".

A best of breed implementation approach can be followed and clients only need license those functional components that are required by the institution.

ITS INTEGRATOR BENEFITS

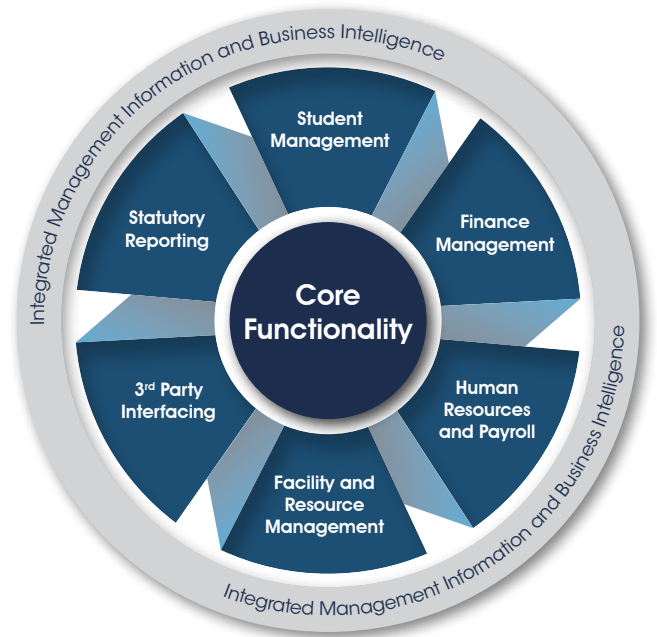

- Fully integrated, yet modular
- Implementation and Support services
- Self-Service applications for students and staff
- Mobile Apps for students
- 24 x 7 system availability from anywhere
- 3rd Party System integration
- Portal deployment with Single Sign-on functionality
- Dashboards with graphs and charts in all functional areas
- Logging of data for audit purposes
- Notes facility throughout the system
- On-line Help and User Manuals are available from each screen and the Help menu
- Data export and import available in selected options
- Detail and summary reports are available in all system modules.
- The Metadata layer assists with MIS and ad hoc report generating.

TECHNOLOGY

ORACLE as a relational database management system is used as underlying technology for the ITS Integrator product suite. ORACLE runs under a number of operating systems, but we prefer the "Open Systems" approach and the system runs under the UNIX operating system (HP-UX, Dec-Unix, Solaris, SCO Open Server, AIX, LINUX, etc.) at our clients.
