BIG BUSINESS BACKBONE
Unshakable systems, built strong for industry, powered by Adapt IT.

DRIVING OPERATIONS EXCELLENCE

Operations Managers have a lot on their minds. We know, because we have spoken to a lot of them. It is not just about running complex plants and meeting production targets. It is about doing more with less, without compromising quality. It is about compliance, and ensuring worker health and safety.

It is about maintaining and optimising the use of assets, minimising downtime. Getting the most from a large, multi-skilled workforce. Overseeing contractors. Managing skills and competency levels. Optimising communication and making plant intelligence available to drive continuous improvement.

We have been interacting and engaging with customers in the manufacturing and mining sector for over 15 years, to understand these challenges and create innovative solutions to address them.
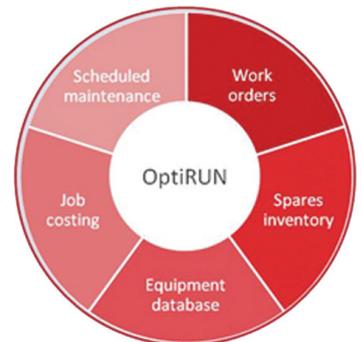

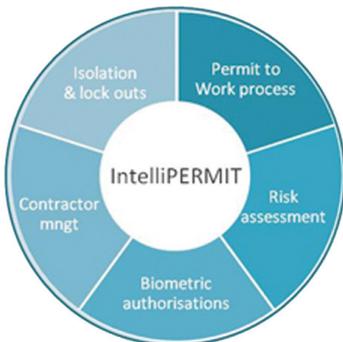

WHAT IS OPSUITE?

OpSUITE is a unique set of software tools that empower you to improve operations performance, enhance worker safety and drive excellence. OpSUITE can be implemented as a fully integrated suite, or as individual solutions to meet the needs of your environment.

OPSUITE SOLUTIONS

IntelliPERMIT is a comprehensive solution for managing permits to work in hazardous operating environments. Manage complex isolation and lock-out procedures, and ensure safety precautions are adhered to. Use fingerprint scanners to control authorisation of permits and provide auditing of each step in the permit process.

What this means for you enhanced control and visibility of the permit to work process, improved compliance to safety standards and a safer work environment.

FlexiLOG is a powerful plant communication tool for managing shift-handover logs, and other essential operating information. Capture, share, and report on information. Turn operators' day-to-day interaction with your plant and systems into vital plant intelligence available to everyone.

What this empowers you to do – improve efficiency, respond timeously to potential problems, share knowledge and learning points and improve coordination between shifts and departments.

OptiRUN is a cost-effective maintenance management solution that is arguably the most user friendly on the market! No complexity, just real results. Manage work orders, schedule preventative maintenance, plan shutdowns, log history, manage your equipment database, manage spares procurement and inventory and report on maintenance costs and key performance indicators (KPI's).

The value for your business – more efficient maintenance processes, reduced downtime and maximum return on investment in plant and equipment.

SmartSURE is a solution that supports implementation and ongoing compliance to safety, health, environment and quality (SHEQ) management systems. Capture, review and report incidents, near-misses and non-conformances. Manage investigations and follow-up actions. Schedule tasks, audits and inspections, record deviations and track corrective actions.

The advantage – improved SHEQ performance, reduced cost of accidents, compliance to health & safety legislation, continuous learning and improvement

ALREADY TRUSTED BY BIG BUSINESS
Proven in South Africa, in a range of operating environments, small and large, the OpSUITE solutions are now used by customers in Africa, Australasia and around the globe, to improve the safety and efficiency of their operations and drive continuous improvement. That is how you know they are the right tools for the job!
